

# PM6881 Counter GPIB Command

PM6680B/81/85

## **\*PUD**

<Arbitrary block program data>

## **Protected User Data**

Protected user data. This is a data area in which the user may write any data up to 64 characters. The data can always be read, but you can only write data after unprotecting the data area. A typical use would be to hold calibration information, usage time, inventory control numbers, etc.

The content at delivery is: #234 FACTORY CALIBRATED ON: 19YY-MM-DD

– YY = year, MM = month, DD = day

**Returned format:** <Arbitrary block response data>

– Where:

<arbitrary block program data> is the data last programmed with \*PUD.

## **Example**

Send -->

```
:SYST:UNPR; *PUD #240Calibrated 1993-07-16, inventory  
No.1234
```

*# means that <arbitrary block program data> will follow.*

*2 means that the two following digits will specify the length of the data block.*

*40 is the number of characters in this example.*
